

28th September, 2014

Dear Independent Education Union of Australia (IEU),

On behalf of the Foundation for Water & Education, Cambodia (FWEC), I would like to thank you very much for your generous support. We received your contributions for the 11 wells and 3 bicycles now those wells are completely finished and the bicycles are delivered to the children who go to school.

Your commitment to helping the people in need in our communities is sincerely appreciated.

Each year the FWEC continues to advance its mission of installing the water wells to provide clean water for the poor people in rural communities. Through our programs of Clean Water & Education we have seen many lives changed for the better. By having water, they become self-sustainable by planting additional crops for a more balanced diet and creates an economic opportunity by enabling the family to sell excess produce at the market.

In addition to Education program, having bicycles allows the children to make it to school much quicker and still have time to help the family in the fields. It may sound like hard burden for a child, but the whole family is aware of how having that education will help the entire family to prosper

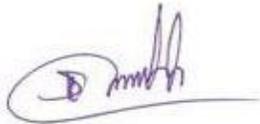

The FWEC was established to help raise and improve the livelihood of the Cambodian people in need and that do not have the resources to pay for the construction of the wells on their own. We provide the wells that help sustain their lives. The FWEC tries to change their conditions of drinking dirty water into clean water for good health and higher standard of living. Our project is the key to supporting and helping those in need to become self-sustainable.

The goal of the FWEC is to continue to make a difference. With the help of donations from supporters like you we will continue to see improvements in our Clean Water project and Education Program. Thank you again for your generous support FWEC. We feel the ongoing, positive results of this endeavor will benefit our community for years to come.

We are sincerely grateful for your support. Please do not hesitate to contact me should you have any further questions.
